Date / Place / Time	Activities / Results / Points of importance
<p>HARD WORKING DAY & PREPARING DAY</p> <p>Thursday 04th May 2023</p> <p>09:00 – 19:00</p>	<p>We all had breakfast and then met in front of the hotels to go to school together. As we were arriving in school, we directly started off by checking the different components of our train installation.</p> <p>The German school had prepared tables for each delegation, so we mainly focussed on our own train and our own equipment in the first part of the work session.</p> <p>In a second step, we then figured out the network and the communication between the different “tables”. The Croation and the Italian delegation were very helpful in fixing the electronic bugs and problems whereas some of us also split off and went to a second room to prepare the final presentation.</p> <p>Preparing the presentation for Friday meant that we had to make up our minds about the order of the different presentations by the delegations as well as some short slide shows showing our work process, the technical drawings and telling the guests about where we come from, about our school at home and our professions and daily routines at home.</p> <p>In the afternoon then we had different “mock presentations” as we all had to practise the necessary routines and procedures. That really took some time and so in the evening at about 6 pm we finally had the perfect match and were able to bring the day to an end.</p> <p>In the evening, we all enjoyed going out in Bad Kreuznach and relaxing in a bar or even outside at the Brückenhäuser, having a drink, an ice cream or anything else.</p> <p>It was a good day!</p>
